

# NEW! Planetary Forecast

by John Clinton, Psychic Astrologer

## JANUARY 2018:

The Full Moon draws close and looms large to the Earth to start the year. This super Moon shines a spotlight on America. The message is clear. It's about caring and nurturing one another. It's a call for men to respect the wonder of women. This point is stamped strongly on the doors to 2018. Business always does well during the Capricorn month. Christmas and New Years give an economic boost. Astrology has a New Year, which starts with the first day of spring. There are many things documented supporting the actual birth of Jesus at that time as well. The 2nd day of 2108 has the erratic energy of Uranus kicking into direct motion. It might feel like the circus came to town. The 6th shows signs of economic growth. Our high-minded actions bring justice. The 8th brings cause to celebrate as that justice is served. More levelheaded court decisions come down on the 14th/15th. There will be 2 very suspenseful weeks to end January. People in high places will be brought down by their wrong-headedness. A war-like energy creeps over the country like a manic delusion on the 25/26th. We get a 2nd Full Moon to end the month. This will closely approach the earth as well, which makes it a Super Blue Moon. It symbolizes a mother peering into a crib with a warm smile, and a deep concern for our future well-being as well.

## FEBRUARY 2018:

Like a bump in our road through life, a Solar Eclipse pops up on the 15th. It brings lessons about teamwork and getting along with others. The 3rd is ideal for reaching an accord on treaties, or legal matters. During the Aquarian part of the month, there will be electronic and social advances. This first 3 weeks is great for the voices of the masses to be heard. Science could find more convincing evidence of life beyond earth. The 10th brings a softness to the human nature. The following weeks see great social unrest as people's rights get stepped on. Meanwhile, Venus is gathering knowledge and messages of love, which can be spread like honey across the land. We have seen already, that peace and love can be brushed aside by those in pursuit of power and grandiosity. The haters are so few when we unite in logical truth and ethical protest. Ancient discoveries and human decency issues are part of the Solar Eclipse of the 15th. This is the time to resolve horrible social issues. This heartfelt understanding comes after the 18th. This week after Valentine's Day can be a beautiful time of love and forgiveness. A cleansing rain begins to wash over the land. If enough muck washes away, we will see the Oneness of all humanity.

**If you are seeking answers to any of life's questions: Career, Money, Love, Health or anything else, an astrological reading from John Clinton will provide more insight and amazing detail than any other type of reading (and likely any other astrologer you have experienced).**
